

World Solar Challenge

Regulation Bulletin 2009/1

Issued Adelaide 1 September 2008

Recognition of additional electrochemical compound

1. With the issue of the bulletin, commercially produced LiFePO_4 (lithium iron phosphate, also designated "LFP") batteries are recognised as *"commercially available secondary cells"*.
2. For the purposes of the 2009 World Solar Challenge, the scientific faculty has determined the maximum allowable mass for LiFePO_4 to be 50.000kg
3. Under the provision of Regulation 4.9, Regulation D.3 is ammended accordingly
