TEAM NOTICE #11/2017

Lighting

If you intend to use direction indicator lamps or brake lamps without UNECE or SAE/DOT compliance markings, you must provide documentation, confirmed by your certifying engineer, which demonstrates compliance with UNECE Regulations 6, 7 and 37 or the SAE/DOT equivalents (Regulation 2.24.3).

We do not require you to have compliance marks on your lamps or to demonstrate conformity of production, but you must provide documentation that shows that your lamps meet the photometric requirements listed in Annex 4 of UNECE Regulations 6 and 7, or in FMVSS 108.

To avoid delays at scrutineering, if you are using lamps without UNECE or SAE/DOT compliance markings you should submit this documentation, with confirmation by your certifying engineer, as soon as possible.
